WORK EXPERIENCE

Leadway Assurance Company Apr 2024 – Present
Frontend Developer Lagos, Nigeria

Leading composite insurance company with 50+ years of operation. As a frontend developer, I build responsive web applications using React and TypeScript for digital insurance platforms serving thousands of customers.

- Built and maintained client-facing applications using React, TypeScript, and Tailwind CSS across mobile and desktop
- Reduced production bugs by 30% through systematic debugging and code refactoring
- Collaborate with backend teams for full-stack feature delivery. Stack: React, TypeScript, Next.js, Tailwind CSS, RESTful APIs

PROJECTS

Money Tracker App | React, Node.js, Firebase, Tailwind CSS
Expense management app with Firebase sync, analytics dashboard, and full responsiveness. [Demo](#) | [GitHub](#)

Knowlz Quiz Platform | React, Firebase, Tailwind CSS
Interactive quiz app with real-time scoring, Firebase authentication, and progress tracking. [Demo](#) | [GitHub](#)

Innovation Architecture Portfolio | Next.js, Tailwind CSS
SEO-optimized portfolio website with modern animations and responsive layouts. [Demo](#) | [GitHub](#)

Leadway Assurance Projects | React, TypeScript, NestJS, PostgreSQL
Enterprise insurance applications with proprietary features. Private repository — available for discussion during interview.
